

Faber Built-in Hood
INKA LUX EVO BK MATT A52

The Inka Lux cooker hood is a luxurious design in the category of built-in extractor hoods. The product is intended for installation in the lower part of the cabinet or as a unit for an individually manufactured extractor hood. The integrated look is enhanced by the lower cover panel with slotted suction. The concentrated air flow of higher speed acquires the property of entraining vapors outside the floor plan suction zone, which is a great benefit in the case of built-in extractor hoods that never completely cover the cooking surface.

Technical Features:

Code: 305.0665.355
Description: INKA LUX EVO BK MATT A52
Materials: Black Matt
Number of engines: 1
Controls: Electronic
Lighting: 1 x LED BAR SLIM 3000K
Width: 520mm

Performance:

Speed: 3+ INT
Flow (m³h): 620 (Max)
Noise Level (db): 67 (Max)
